

# LYNCH URBAN SEATING

## ON-SITE DELIVERY

When receiving your products with on-site delivery, you will be receiving the delivery on our company owned truck. Our team will have been in touch with you to confirm the delivery location, hours of operation and to obtain the site contact person.

The delivery location must have adequate space for the truck to park. During a delivery we off load from one location only. The truck is a 32' straight body truck with a mounted crane. The unloading area must have suitable hardpack terrain for a heavy vehicle.

Our driver will rig the benches for lifting and off load directly next to the truck. **You must provide a crew of 2-3 people to move the benches away from the truck as they are unloaded.** If you need to move them a further distance with a machine, we recommend two 16' straps with eye loops at the ends.
